

Park Ridge State High School

Park Ridge SHS - Cool Schools

CLIENT:	AE Smith Service
LOCATION:	Logan, QLD
PROJECT VALUE:	\$420,000.00
CONTRACT PERIOD:	6 Weeks
COMPLETION DATE:	August 2020

PROJECT DESCRIPTION

EDSS were contracted By AE Smith and the Department of Education to upgrade the electrical infrastructure to allow the operation of over 40 air conditionings units to several classrooms.

Our scope of works included all excavation and installation of new underground pits and conduits. We installed several large submain cables to 6 different buildings and replaced several distribution boards. Upon completion of the works, EDSS restored all concrete pathways and grassed areas while the school was still in operation.

EDSS self-performed all aspects of the work from in house capabilities including manufacturing of several large switchboards within a 4 week lead time. The ability to deliver switchboards in very short time frame contributed to EDSS being awarded this project and delivering another successful project for our client on a very compressed timeline.
